

**WORLD'S FIRST UL LISTED
ALUMINUM WATER & FOAM MONITOR**
IDEAL FOR COASTAL AND HIGH SALINITY AREAS

**Aluminum Water &
Water Cum Foam Monitor**

ALUMINUM WATER & WATER CUM FOAM MONITOR

Vimal Fire Controls presents World Class UL-Listed manually operated Water & Water cum Foam Monitor, made up of Aluminum Alloy. It has discharging range from 250 to 1000 US GPM at 100 psi (7 bar) inlet pressure over a distance ranging from 40 to 70 meters in the horizontal direction @ 30° - 35° elevation.

This Monitor can easily be operated by single person. As it does not corrode due to climate condition viz.. moisture or salinity in the air, it is an ideal Monitor for all locations including Coastal areas like, Onshore and Coastal Oil Installations and Ports etc.

FEATURES:

- Discharge Capacity of 250-500-750-1000 US GPM at 100 Psi (7 bar) inlet pressure
- The excellent Horizontal throw of 40 - 70 meters & above
- Ease of maneuverability in the horizontal and vertical plane
- Flexible installation options include numerous base options and a hydrant mounting choice
- For Water cum Foam Monitor - Foam induction ratio is 3%
- Self-induction with Pick-up tube of length 3 mtrs

ADVANTAGES:

- World's first UL Listed Aluminum Monitors
- Light weight, about 30% lighter
- Rust/Corrosion resistant – ideal for Coastal & high salinity areas
- Non - reactive to most of the chemicals & therefore more suitable for Chemical Industries
- Maintenance free
- Self Locking type arrangement
- Hydrostatic test pressure up to 35 Kg/cm²
- Shelf life up to 10 years
- Value for Money Product with cost much less compared to SS Monitors.

APPLICATIONS:

Oil Drilling and Exploration | Refineries and Hydrocarbon Units | Petro chemical complexes
Oil Marketing Installations | Chemical & Fertilizer Plants | Port Trust installations | Power Plants
Defense | Airports etc.
